## DECLARATION OF JAY STURM PURSUANT TO LOCAL BANKRUPTCY RULE 1007-2

STATE OF NEW YORK	)
	) ss.
COUNTY OF NEW YORK	)

JAY STURM, being duly sworn, deposes and says:

1. I am the Secretary of r4 Vascular, Inc. (the "<u>Debtor</u>"), a Delaware corporation with an address at 1270 Avenue of the Americas, Suite 302, New York, N.Y. 10020. Pursuant to Bankruptcy Rule 1007(d) and Local Rule of this Court 1007-2, the Debtor provides the following information.

#### Local Rule 1007-2(a)(1)

2. The Debtor owns and operates a medical device development business specializing in peripheral vascular access products that are sold either via direct sales or through distributors. The Debtor combines innovative design and manufacturing supervision with an

intimate knowledge of the needs of patients, oncologists, interventional radiologists, surgeons, and nurses to create specialized premium access vascular products. These products help clinicians access patient vasculature, and effectively maintain access for delivering chemotherapy, blood products, antibiotics, drugs or nutrition.

- 3. The Debtor's employees and contractors represent in-depth experience in the medical device industry, with unrivaled experience and insight in vascular access.
- 4. The Debtor's products include the Zeus biomimetically coated, peripherally inserted central catheter ("PICC"), which is the first Biomimetic coated PICC on the market, and the first non-valved saline-maintainable PICC. The Biomimetic coating on inner and outer surfaces mimics vessel tissue; is non-eluting and allows heparin free maintenance and reduces thrombosis accumulation. The biomimetic coating does not change over time, and the PICC may remain indwelling for longer periods of time because thrombosis accumulation is reduced and less pressure is required to clear thrombosis.
- 5. The Debtor also developed and manufactures the Pegasus CT PICC line, which is the Debtor's uncoated power injectable PICC for patients who may not need a biomimetic coated PICC. It incorporates a novel hub that allows the clinician to suture anywhere along the patient pending hub, or use of a sutureless system for secure placement. This small feature simplifies catheter placement and gives the Debtor's PICC distinct adaptability in a wide range of placements. The power injection line is an important adjunct for injection of fluids like contrast media for diagnostic imaging. Additionally, the multiple lumen design of the Debtor's catheters helps reduce needle sticks for greater patient comfort and safety. More lumens may also lessen access procedures by the clinician and care-giver important goals for intravenous access.
  - 6. Another device developed, but not released, by the Debtor is DrainEx, a rapid

13-12409-scc Doc 3 Filed 07/25/13 Entered 07/25/13 15:55:14 Main Document Pg 3 of 20

exchange drainage catheter. DrainEx is a kink resistant polyurethane catheter with a patent pending rapid exchange lumen, and built in suture cutting cleat that enables a single clinician to lock the catheter without needing a second set of hands. Because drainage catheters sometimes fail because of occlusion, replacement procedures routinely take longer to exchange out and often need a more invasive replacement catheter. The Debtor's exchange lumen should reduce hospital costs and allow for a quick exchange of the failed catheters.

- 7. Other products developed and manufactured by the Debtor include Duraspan, a biomimetically coated dialysis catheter which allows for access and flow for the long term. Duraspan's non-eluting biomimetic coating brings increased reliability and performance to long term dialysis access. The Debtor also developed the Pherocious CT Apheresis Catheter, which has been described as the new standard for addressing the challenges of long term apheresis. Finally, the Debtor manufactures numerous accessories for catheter placement and maintenance.
- 8. Importantly, due to poor market acceptance of the Debtor's catheter products, and an unexpected product recall of its Duraspan catheter due to manufacturing issues, the Debtor ceased sales of its entire catheter line early in the second quarter of 2012. The Debtor's financial difficulties are due to the cessation of sales of its catheter line; thus its inability to cover operating expenses. As a result, the Debtor's senior secured creditor found itself with a significant equity investment in the company and essentially zero sales to cover operating costs.
- 9. Beginning in 2009, Debtor began development of an ultra-high-pressure

  Percutaneous Transluminal Angioplasty (coronary) balloon catheter, trade named "Vector" that

  was designed to be used in dilating calcified lesions in patient vasculature. Debtor's corporate

  strategy was to diversify its business away from the catheter products described above and that

  sales from the catheter products would provide cash flow to cover the cost of the Vector

development program. Unfortunately, this was not the case and the pursuit of the Vector development program resulted in significant expenditures of Debtor's capital and the Debtor was also required to raise substantial additional capital, which the senior creditor provided in the form of a secured line of credit in July 2010.

- and costing far more than anticipated. However, submission to the FDA was achieved in late 2010, and based on anticipated FDA approval of the Vector coronary balloon catheter Debtor began the process of marketing the company in whole or in parts (e.g. offering to split Debtor's Vector product from its non-balloon catheter product lines.) The Debtor had three significant indications of interest at reasonable valuations over the course of the next 18 months all of which were terminated without sale.
- Debtor. Further, having exhausted all other sales opportunities, Debtor made the decision to accept the only bid that passed due diligence review for Debtor's non-balloon catheter related intellectual property (i.e. two 510K FDA approvals associated with certain of the peripheral access catheter products). In April 2013 the Debtor sold this intellectual property to C.R. Bard for \$500,000. As of July 2013, the funds received from this sale have been almost fully expended on overhead, and without a source of continued financing, the Debtor had no choice but to file for relief under Chapter 11.
